

NINJA MISTER

Cover large areas for disinfecting quickly and easily with the **Ninja Mister**.*

Designed with two-10 gallon capacity holding tanks allows for adequate solution storage to keep going when others require a refill and two spray guns offer dual operator capability, saving time when it matters the most. Each tank is equipped with a 150PSI pump and its own switch for easy operation.

Each spray gun offers a 16" stainless steel extension rod for hard to reach areas and dispenses at a 110 degree angle from a 1.5 orifice jet.

The Ninja Mister is CSA/US approved for use in government buildings including hospitals, care centres, schools, recreation centres, etc.

* Always follow the directions on the manufacturer's label for application instructions and safety information.
